

There is no one size fits all skincare treatment that suits everyone. No one's skin is the same. Many factors play a part in the health of your skin; Genetics, lifestyle choices, and your environment. So it's only right you receive a customized treatment plan as well as a homecare regimen to address your concerns such as acne, post inflammatory hyperpigmentation (caused by inflamed acne), excessive oiliness, hyperpigmentation, fine lines/ wrinkles, dry, dehydrated, sensitive or rosacea skin. Treatments are recommended every four weeks; more frequently for corrective treatments.

Face Reality \$75

“Acne Boot Camp”

Face Reality Acne skincare has created a unique approach to clearing acne-prone skin. Acne is mostly an inherited disease of the pores but can be affected by other lifestyle factors. Dead skin cells are shedding much too quickly in the acne prone pore. It forms a plug along with sebum and hair and this is where the problem begins. If the body doesn't see the plug as an invader, then it remains a noninflamed lesion, aka blackhead. If it does, then it forms into pimples, pustules and cysts.

Unlike brief dermatologist visits, this program is a completely guided journey to clear skin. We will begin with a thorough consultation and design a customized homecare program that best suits YOU and treats your specific acne conditions.

Twice daily homecare combined with bi-weekly treatments can have your skin clear in just about 90 days (sometimes longer). We are very thorough and teach you everything you need to know to stay on track. But you have to be willing to stay the course and do your part.

High Frequency and cold therapy are included in every treatment. High frequency is a safe, thermal stimulation, gentle oscillating and oxygenating power that has been shown to increase blood circulation, eliminate toxins and acne-causing bacteria, encourage lymphatic drainage, and improve product absorption.

Add-on

LED Light (Blue Light) for extra bacteria killing power \$20

Glow on the Go 45 mins \$65

Your skin will definitely glow with this perfect treatment customized to your skin needs.

Double cleanse, analyzation to see exactly what your skin needs, enzymatic or mechanical exfoliation, warm hand treatment, hot aromatherapy towels and customized treatment mask. NO extraction included.

Clinically Corrective Treatments

Clinical Treatments such as chemical peels are the key to flawless, younger looking skin. Peels can dramatically improve your skins tone and texture, the appearance of hyperpigmentation, and aging skin within a 3 month period with a consistent homecare regimen.

Peels such as lactic, glycolic, mandelic, salicylic, Jessners and TCA breakdown the glue that holds dead, dull skin cells together, and allows your skin to shed off a layer of old skin and make room for new, healthier skin. This is accomplished by creating a controlled injury to the skin resulting in the wound healing process to begin and regenerate new tissue. The regenerated skin will be soft, smoother, less wrinkled, more even in skin color addressing sunspots, and blotchiness.

Not every peel will cause your skin to peel. Lighter peels are still just as effective with no downtime. Medium depth peels require a few days of downtime and you will be provided with a mini homecare kit and instructions for the days following. Exfoliating treatments are customized by matching the correct peel to the proper skin type, concerns and conditions. Fitzpatrick types are always taken into careful consideration.
